                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Pred. No. is the number of results predicted by chance to h
score greater than or equal to the score of the result bein
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    sued Patents NA:*

Sequence 254, Application US/09312283C

Patent No. 65731095

GENERAL INFORMATION:

APPLICANT: Watson, James D.

APPLICANT: Sleeman, Matthew

APPLICANT: Onrust, Rene

APPLICANT: Kumble, Krishanand D.

TITLE OF INVENTION: Compositions Isolated from Skin Cells

TITLE OF INVENTION: and Methods for Their Use

TITLE REFERENCE: 11000.1011c2

CURRENT APPLICATION NUMBER: US/09/312,283C

CURRENT FILING DATE: 1999-05-14

NUMBER OF SEQ ID NOS: 425

SOFTWARE: EastSEQ for Windows Version 4.0

SEQ ID NO 254
